

Energy Services for Business

Helping Businesses Reduce Energy Costs

All businesses are concerned about the costs of energy and are seeking ways to enhance competitiveness and improve their environmental performance.

Sustainable Energy Ireland (SEI) is Ireland's national energy agency and its mission is to support and assist the development of sustainable energy in Ireland.

SEI supports businesses through advice and training programmes that boost the competitive edge of Irish companies and help increase profits.

Energy Assessments

SEI offers firms free assessments to analyse current energy use and identify immediate opportunities for savings. Advice on appropriate monitoring and management is also provided.

How this works:

- Firms register with SEI and are matched with one of our energy experts.
- The expert will contact them and talk through their issues first by phone and then, if appropriate, on-site, conducting an assessment of opportunities for savings.
- The expert will recommend the best actions for the firm and maintain contact over time to provide ongoing support.

Energy Management Training

Training Courses

SEI runs group and sector-specific tailored training courses (half-day, one-day or three-day) that offer introductions to energy management.

Many courses include on-site assessments for participating firms.

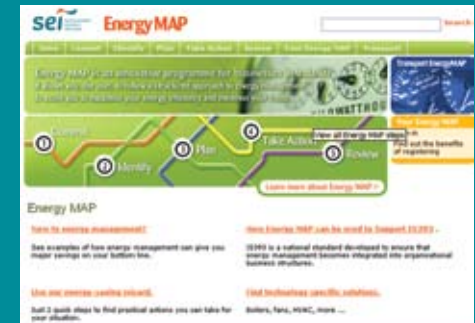

Website

Advice on good energy management for all types of business is available on our website, www.sei.ie/energymap

It offers a step by step structure that is easy to follow and implement, as well as specific tips on a range of energy technologies and ideas. Guidance and tips are available for all businesses, regardless of size or energy management experience.

Other SEI programmes for business include:

- the **Large Industry Energy Network** and the **Energy Agreements Programme** – supporting larger businesses ready to commit to advanced energy management action.
- the **Sustainable Energy Awards** – an all-island award scheme recognising best achievements in organisations across energy efficiency and renewable energy.
- **grant support** – for businesses installing alternative heat technologies such as Combined Heat and Power (CHP) or bioheat boilers.

For more information, see our website www.sei.ie/business or contact us at business@sei.ie or **01-8082087**
